User Guide for Rat in a Maze & Typing Master Executables

Prepleaf Elite

1. Installation and Setup:

1. Download the provided ZIP file.

2. Locate the downloaded ZIP file and extract its contents to a preferred location on your computer.

2. Executing the Applications:

a. Rat in a Maze:

Inside the extracted folder, locate and double-click the *RatInAMaze* executable. The program should launch immediately inside the terminal.

b. Typing Master:

Inside the extracted folder, locate and double-click the *TypingMaster* executable to initiate the program inside the terminal.

3. Important Guidelines:

- **Preservation of Files:** It's imperative that you **DO NOT** delete, move, or modify any internal files or folders within the extracted directory. The *TypingMaster* application, in particular, relies on certain internal assets for its functionality. Tampering with these might render the application non-functional.

4. Submission of Your Own Code:

1. Save your code to an appropriate file format.

2. Upload your code file to GitHub Public Repo.

3. Submit your Github Repo link on the Course Platform assignment.

We hope these instructions provide clarity. Should you have any queries or face any issues, please do not hesitate to reach out.
